Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- This Fund is ranked at 5 because funds of this type have experienced medium to high rises and falls in value in the past.
- Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
 - Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. This may mean your money is at greater risk.
 - This Fund invests in a specialist sector and it will not perform in line with funds that have a broader investment policy.
 - The Fund may invest directly or indirectly in Chinese domestic securities markets via various channels, including the Shanghai-Hong Kong Stock Connect programme or through any similar acceptable securities trading and clearing linked in relation to which the Fund may suffer difficulties or delays in proving it owns the China shares or enforcing its rights given that the legal and regulatory rules in each of Shanghai and Hong Kong are very different. Use of these channels therefore bring additional risks as further described in the Fund's Prospectus under "Investing in China".
 - The Fund may invest in companies through a domestic legal structure (i.e. Variable Interest Entity or "VIE"), in order to gain access to industries with foreign ownership restrictions. There is a risk that investments in these structures may be adversely affected by changes in the legal and regulatory framework.
