

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Aberdeen Standard SICAV I - China Onshore Bond Fund I Acc EUR - LU1834169366

A sub-fund of Aberdeen Standard SICAV I which is a Société d'Investissement à Capital Variable (SICAV). Aberdeen Standard Investments Luxembourg S.A. is the Management Company.

Objectives and investment policy

The Fund's investment objective is to achieve a combination of income and growth by investing mostly in bonds (which are loans that can pay a fixed or variable interest rate) priced in Onshore Renminbi (CNY) which are issued by governments, government-related bodies, and/or corporations. The fund may also invest into bonds priced in Offshore Renminbi (CNH) which are issued by governments, government-related bodies or corporations around the world, as well as bonds priced in other currencies which are issued by the Chinese government, government-related bodies or corporations based, or carrying out the majority of their business activities in mainland China.

The Fund may invest up to 100% of its assets in Mainland China securities listed on the PRC stock exchanges or traded on other PRC markets, including the China Interbank Bond Market, through available QFII and RQFII quotas or by any other available means.

The Fund is actively managed within its objective and is not constrained by a benchmark.

The Fund will not invest in any securities that are rated below B- by Standard & Poor's Corporation ("S&P") or an equivalent rating from another rating agency as at the date of investment. In the event that any securities held by the Fund are subsequently downgraded to a rating below B-, the Investment Manager may maintain a maximum total exposure of 3% of the Fund's Net Asset Value to such downgraded securities but will divest any such security that has not been upgraded to a rating of at least B- within six months of its downgrade.

We may use investment techniques (including derivatives) to seek to protect and enhance the value of the Fund and to manage the Fund's risks. Derivatives, such as futures, options and swaps, are linked to the rise and fall of other assets. In other words, they "derive" their price from another asset. They can generate returns when share prices and/or indices fall.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You can buy and sell shares in the Fund usually on any working day in Luxembourg, by 13.00 hours CET. Please refer to www.aberdeenstandard.com for details of any non-dealing days.

Income from investments in the Fund will be rolled up into the value of your shares.

Further information on the Fund's investment objective and policy can be found in the Fund's Prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- This Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past. • Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund: • The Sub-Fund's exposure to a single country market, which may be subject to particular political and economic risks, may cause the sub-fund to be more volatile than more broadly diversified funds. • Bonds are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. The fund's portfolio may have significant exposure to bonds that typically have lower ratings. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond. Where a bond market has a low number of buyers and/or a high number of sellers, it may be harder to sell particular bonds at an anticipated price and/or in a timely manner. • Contingent convertible bonds can automatically convert into shares or be written down if the financial strength of the issuer falls in a certain way. This may result in substantial or total losses of the bond value. • Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. This may mean your money is at greater risk. • The Fund can use derivatives in order to meet its investment objectives or to protect from price and currency movements. This may result in gains or losses that are greater than the original amount invested. • The Fund may invest directly or indirectly in Chinese domestic securities markets via various channels, including the China Interbank Bond Market (CIBM), which may carry greater risks and, as a result, may incur additional costs and suffer losses. This is further described in the Fund's Prospectus under "Investing in China". • The Fund may invest all its assets in securities in Mainland China. In such circumstances all the assets of the Fund may be maintained by the PRC Custodian.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.65%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	0.00%
-----------------	-------

- Switching charge (for switching into the Fund from another fund) 1.00%.
- The ongoing charges figure is estimated because the share/unit class is relatively new and has insufficient track record for us to calculate it exactly. The ongoing charges figure may vary from year to year and will exclude the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- The ongoing charges figure shown here is an estimate of the charges. An estimate is used in order to provide the figure that will most likely be charged. The UCITS' annual report for each financial year will include detail on the exact charges made.
- In respect of the Entry charge, this charge may also be applied to switches.
- In respect of the Switching Charge, this is the current maximum charge that may be applied under the terms of the Prospectus. In some cases, you may pay less; you should speak to your financial adviser about this. For more information about charges, please refer to the Fund's Prospectus. The ongoing charges figure is as at 31/12/2018.

Past performance

There is insufficient data to provide a useful indication of past performance to investors.

- Fund launch date: 31/05/2018.
- Share/unit class launch date: 20/07/2018.
- Performance is based on the Fund's net asset value at the end of each year, net of annual charges except for any initial charge.
