A sub-fund of Aberdeen Investment Funds ICVC. Aberdeen Standard Fund Managers Limited is the Authorised Corporate Director that manages the Fund.

### Objectives and investment policy

**Objective:** To generate income and increase the value of the shareholder's investment over the long term (income and capital growth).

**Investment policy:** The Fund invests more than 50% of its total net assets in worldwide equities and bonds, with the remainder invested in other asset classes such as cash, property and infrastructure. The Fund's bond investments may be issued by governments, corporations and other large organisations, and may be any credit quality. The Fund may gain exposure to some assets by investing in other Funds (mainly those managed by the investment adviser or its affiliates).

The Fund has a wide range of investment powers. The Investment Manager has the flexibility to amend the investment allocation between different asset classes, in line with its view on markets, in pursuit of the investment objective.

**Derivatives:** This Fund can use derivatives in order to meet its investment objective as well as for efficient portfolio management, which includes reducing exposure to various investment risks (hedging). The Fund may use derivative instruments to create short and / or long positions in currencies other than the base currency. The use of derivatives is not expected to increase the risk profile of the Fund.

**Benchmark:** The Fund is actively managed within its investment objective and policy, and is not limited by any benchmark.

If you invest in income shares, income from investments in the Fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

**Recommendation:** This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You can normally submit instructions to buy and sell shares in the Fund, between 9am and 5pm, on any day which is a working day in London. However, please see [aberdeenstandard.com](http://aberdeenstandard.com) for details of any non-dealing days.

Further information about the Fund can be found in the Prospectus.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- This Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past.
- Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The value of investments and the income from them can go down as well as up and investors may get back less than the amount invested. The indicator does not take into account the following risks of investing in this Fund:
  - **Bonds:** Bond valuations are affected by changes in interest rates, inflation and the creditworthiness of the bond issuer. There is a risk that a bond issuer may not be able to repay the money they borrowed nor make their required interest payments. This risk increases for bonds with lower credit ratings. Where a bond market has a low number of buyers and/or a high number of sellers, it may be harder to sell particular bonds at an anticipated price and/or in a timely manner.
  - **Derivatives:** This Fund can use derivatives in order to meet its investment objective. The use of derivatives may result in greater fluctuations in the value of the Fund, and may increase the magnitude of any losses.
  - **Emerging Markets:** Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries and this may mean your money is at greater risk.
  - **Exchange Rates:** The Fund may have holdings which are denominated in different currencies and may be affected by movements in exchange rates. Consequently, the value of the Fund's investments and the income from them may rise or fall in line with exchange rates.
  - **REITs:** The Fund may invest in real estate investment trusts (REITs) which themselves invest directly in real estate. Under adverse market or economic conditions, such assets may become difficult to buy or sell or experience a drop in value.
- A full list of risks applicable to this Fund can be found in the Prospectus.
