ES Ardevora UK Income Fund (“the Fund”)

Institutional Income Shares

This is a Sub Fund of ES Ardevora ICVC, an open-ended investment company

ISIN: GB00B78H6035

Equity Trustees Fund Services Ltd is the Authorised Corporate Director of the Fund

Objectives and investment policy

Objective:

The Fund aims to achieve income and long-term capital growth with a bias towards income.

Investment policy:

The Fund will primarily invest in a focused portfolio across a diversified range of UK shares (equities) or equity-related securities (such as ordinary and preference shares, global depositary receipts and American depositary receipts) listed or traded on regulated markets such as the London Stock Exchange.

Essential features of the Fund:

The Investment Manager has discretion over the assets held within the Fund. As a means of monitoring performance the Investment Manager will review performance against its benchmark, the FTSE All-share index, over the long term.

In the event that the Investment Manager believes that significant market falls could occur, the Fund may sell investments and hold a high proportion of cash or holdings similar to cash.

The Fund may hold up to 10% in other Funds.

Income arising from the Fund will be distributed.

You may redeem shares in the Fund usually on each business day.

The choice of underlying assets will be biased towards shares offering value which are expected to pay dividends.

Derivatives and forward transactions may be used for hedging purposes only. The prices of these instruments can change very quickly and are based on the movement of another asset. Hedging means that they can only be used to reduce the effect of an existing exposure such as currency in order to reduce overall risk.

The minimum recommended holding period for the Fund is five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

This Fund is ranked at 5 because Funds of this type have experienced medium to high rises and falls in value in the past.

The following risks may not be fully captured by the risk score:

- The risk and reward score is based on past performance and calculated in accordance with European legislation. It may not be a reliable indication of the future risk profile.
- The risk and reward score is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- A limited number of shares may be held at certain times which could increase the volatility of the Fund.
- The Fund could hold significant cash or near cash weightings. If investment markets generally rose during this period, against the Investment Manager’s expectation, then the Fund performance would be reduced.
- The Fund is actively managed and the Investment Manager will use its skill and judgement to identify companies which offer value. There is no guarantee that the Investment Manager will be successful.
