Scottish Widows UK Tracker Fund Class G Income

A sub-fund of the Scottish Widows Tracker and Specialist Investment Funds ICVC.
The Fund is managed by Scottish Widows Unit Trust Managers Ltd, part of the Lloyds Banking Group.
ISIN: GB00B8DK5077

Objectives and investment policy

To give long-term capital growth by tracking the performance of the UK equity market, currently represented by the Financial Times Stock Exchange 100 Index (FTSE 100 Index). The fund normally invests in all of the shares in the Index, but may invest in a sample of shares and derivatives. Discretion may be used over investing in shares entering or exiting the Index.

The Index measures the performance of shares of the 100 largest companies listed in the UK. The fund aims to perform in line with the Index on a rolling 3 year basis.

Investors should aim to hold their investment in the Fund for the medium to long term (at least five to ten years).

Any Income received by the Fund will be paid out to you.

The Fund is allowed to use derivatives (contracts which have a value linked to the price of another asset) for the following reasons, normally referred to as Efficient Portfolio Management (EPM):

- *to help reduce risk,
- *to help reduce cost,
- *to help generate extra capital or income for the Fund with an acceptably low level of risk.

We calculate the value of the Fund at 8am daily on working days in the UK. Our dealing times are from 9am to 5pm each working day. Instructions received before 5pm will receive the next available price.

The Fund may engage in securities lending, please refer to the prospectus for further details.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk ← → Typically higher rewards, higher risk

- The Fund is ranked at 5 because it has experienced medium to high levels of volatility over the past 5 years.
- The value of your investment and any income from it is not guaranteed and can go up and down depending on investment performance. Specific investment risks for the Fund are:
 - Company shares ('equities') generally offer higher long term growth potential than some other asset classes. Values can fluctuate considerably. There's a greater risk you might not get back all of your money.
 - Derivatives used for Efficient Portfolio Management may result in greater fluctuations of the value of the Fund, however it is not intended that this will cause the risk profile of the Fund to change.
 - As the Fund invests predominantly in companies which are part of the Financial Times Stock Exchange 100 Index , performance, before charges, may fall and rise with the Index.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	1.00%
