

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Scottish Widows Developed Government Bond Tracker Fund
Class A Accumulation

A sub-fund of the Scottish Widows Investment Solutions Funds ICVC.
The Fund is managed by Scottish Widows Unit Trust Managers Ltd, part of the Lloyds Banking Group.
ISIN: GB00BKRY603

Objectives and investment policy

To track the performance of the FTSE World Government Bond Index – Developed Markets currency-hedged in GBP terms (the “Benchmark Index”), before deduction of fees, by investing in investment grade government bonds (also known as fixed interest securities).

The Fund aims to closely track the Benchmark Index utilising a stratified sampling or ‘optimisation’ approach that aims to produce returns and volatility closely aligned to the Benchmark Index. The Fund may be unable to purchase the constituents of the Benchmark Index in accordance with the weightings of the Index due to events such as large cashflow, market or security specific liquidity constraints or prohibitive trading costs. The Fund will invest in investment grade bonds* issued or guaranteed by governments and supranational bonds**. The Fund will invest in developed markets only.

The bonds can be denominated in any currency, but non-Sterling investment grade bonds will be hedged back to Sterling to offset the effect of currency exchange rate movements.

The Fund may also invest in cash including cash-like investments. The Fund may invest in asset backed securities such as securitised loans and covered bonds where included in the Benchmark Index.

Investment in the asset classes will be direct, and indirect using derivatives as an additional way for the Fund to invest with the aim of meeting the Fund’s investment objective. The extent of derivative use for investment purposes is dependent on market conditions and will be limited as the intention is that this should not change the risk profile of the Fund.

The Fund may invest in collective investment schemes, including those managed by the ACD and its associates.

Derivatives and stock lending may be used for the purpose of managing the Fund in a way that is designed to reduce risk (for example by hedging) or cost and/or generate extra income or growth (often referred to as efficient portfolio management).

*Investment grade bonds have achieved or exceeded a minimum credit rating awarded by a credit rating agency, indicating lower risk as issuers are likely to make their payments.

** Supranational bonds are a type of fixed interest security issued by two or more governmental organisations.

The FTSE World Government Bond Index – Developed Markets currency-hedged in GBP terms has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the developed global government bond market. Note: The Fund will underperform the Benchmark Index after deduction of fees.

Investors should aim to hold their investment in the Fund for the medium to long term (at least five to ten years). Any Income received by the Fund is retained in the Fund and has the effect of increasing the share price. We calculate the value of the Fund at 8am daily on working days in the UK. Our dealing times are from 9am to 5pm each working day. Instructions received before 5pm will receive the next available price.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- As this Share Class has been available for less than 5 years, we have used simulated historical data for the part of the 5 year period before the fund began. The Share Class is ranked at 4 because, based on simulated data, it has experienced medium levels of volatility over the past 5 years.
- The value of your investment and any income from it is not guaranteed and can go up and down depending on investment performance. Specific investment risks for the Fund are:
 - The value of a bond / fixed interest security could fall if the issuer’s credit rating falls. Values are also likely to fall if interest rates rise (but increase when interest rates fall). In addition issuers might fail to make their income payments and/or repay capital.
 - Where a Fund seeks to perform in line with an index there is a risk its performance might be below that of the index.
 - The benchmark index may be determined, composed or calculated inaccurately by the Index provider. This may affect the performance of the fund, may lead to gains or losses and may not be identified and corrected for a period of time.
 - Over 35% of this fund can be invested in fixed interest government or public securities from a single issuer, which increases the risk to the fund if the issuer is unable to make their payments.
 - Using derivatives for investment purposes is not intended to increase the Fund’s risk profile, but may increase volatility. Derivative strategies could increase or reduce the impact of market movements which has the potential to result in greater losses, or gains, to the Fund.
 - The use of derivatives for Efficient Portfolio Management might not achieve the described outcomes and may result in greater fluctuations of the value of the Fund, however it is not intended that this will cause the risk profile of the Fund to change.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.67%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- There is no charge to switch into the Fund.
- The Ongoing Charges Figure (OCF) is as at 16/06/2025.
- The annual report for each financial year will include detail on the exact charges made.
- The OCF is taken from the income of the Fund. For more information about charges, please refer to the Prospectus of Scottish Widows Investment Solutions Funds ICVC, which is available at www.scottishwidows.co.uk/kiids

Past performance
