

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Baillie Gifford Worldwide Global Income Growth Fund - Class B CHF Acc

Accumulation Shares - ISIN IE00BN15WV93

This Fund is a sub-fund of Baillie Gifford Worldwide Funds PLC.

Objectives and investment policy

Objective

- The Fund aims to achieve a higher level of income than global equities whilst, over the longer term, achieving growth in both income and capital.

Policy

- To invest in shares of companies worldwide.
- The Fund is actively managed and no index is used for the purposes of determining or constraining the composition of the Fund's portfolio. The Fund's performance (after deduction of costs) and yield is measured against the MSCI All Country World Index. The Fund seeks to outperform the index.

Other Information

- You can sell some or all of your shares on any day on which banks in Ireland are open for business by contacting the Transfer Agent by phone or post.
- Income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.
- The Fund is classified in the category above because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds or cash. Where no share price history is available for any part of the last five years (and thus no returns), the returns of the Fund's comparative index is used in its place to calculate the Risk and Reward Indicator.
- The indicator does not take into account the following relevant material risks:
 - Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and you may not get back the amount invested.
 - The Fund has exposure to foreign currencies and changes in the rates of exchange will cause the value of any investment, and income from it, to fall as well as rise and you may not get back the amount invested.
 - Custody of assets, particularly in emerging markets, involves a risk of loss if a custodian becomes insolvent or breaches duties of care.
 - The Fund invests in emerging markets where difficulties in trading could arise, resulting in a negative impact on the value of your investment.
 - Part or all of the expenses of the Fund will be taken from the Fund's capital. This will reduce the capital value of the Fund. The amount of expenses that will be charged to capital for the current financial period has not yet been determined.
 - Bonds issued by companies and governments may be adversely affected by changes in interest rates, expectations of inflation and a decline in the creditworthiness of the bond issuer. The issuers of bonds in which the Fund invests, particularly in emerging markets, may not be able to pay the bond income as promised or could fail to repay the capital amount.
 - Infectious viruses may pose significant threats to human health and may be highly disruptive to global economies and markets. The economic and market disruptions caused by infectious viruses could impact the value of the investments of the Fund and the distributions paid by the Fund to shareholders.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.40%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is estimated because the share/unit class is new and has insufficient track record for us to calculate it exactly. The ongoing charges figure may vary from year to year and will exclude the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- The Fund's annual report for each financial year will include detail on the exact charges made.
- You can find further details about the charges in the fees and expenses section of the Prospectus, which is available by contacting us.
- Please note that the management fee will be at a reduced rate as specified in the Prospectus, for a limited period of time. Until the expiry of this offer the ongoing charges will be 0.40%.

Past performance

There is insufficient data to provide a useful indication of past performance to investors.
