MI Polen Capital Emerging Markets Discovery Fund (“The Fund”) A Income GBP Shares

This is a sub fund of MI Polen Capital Investment Funds. The Fund is an Open Ended Investment Company.
ISIN: GB00BKPJ1T76.
Apex Fundrock Ltd is the Authorised Corporate Director of the Fund (“MI” and “MI Funds” are trading names of the ACD).

Objectives and investment policy

The Fund aims to grow your investment.

The Fund aims to outperform the MSCI Emerging Markets SMID (Small-Mid Capitalisation) Index (with net dividends reinvested) over a 5 year period. However, there is no guarantee that this return will be achieved and investors should note that capital is at risk.

The Fund will invest in shares of companies with a value of less than US\$15 billion, at the time of investment, that are established or operating in emerging and frontier market countries. These are countries that are still developing their economies. The Fund will invest at least 80% (but usually significantly more) in Asia, Eastern Europe, the Middle East, Africa and Latin America.

The Fund can use derivatives (financial instruments whose value is linked to the rise and fall of other assets) for the purposes of efficient portfolio management, with the aim of managing risk and cost.

Any income this share class generates will be paid out to you.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full investment objectives and policy details please refer to the prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

- This Fund is ranked at 7 because funds of this type have experienced very high rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease and increase.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. This means your money is at greater risk.
- In difficult market conditions, the value of some investments may be less predictable than normal and the Fund may not be able to buy and sell these investments at the best time or at a fair price. This could affect the Fund’s performance, potentially reducing your returns.
- For further risk information please see the prospectus.
