This document provides you with key investor information about this fund. It is not marketing material. MI Quilter Cheviot Fixed Interest Fund (“the Fund”) B Accumulation Shares

This is a sub fund of MI Quilter Cheviot Investment Funds. The Fund is a non-UCITS retail scheme Open Ended Investment Company. ISIN: GB00BP2C4391. Apex Fundrock Ltd is the Authorised Corporate Director of the Fund (“MI” and “MI Funds” are trading names of the ACD).

Objectives and investment policy

The Fund aims to deliver income and the potential for capital growth on a rolling five-year basis, by investing predominantly in a diversified portfolio of UK and global bonds either directly or indirectly.

The Fund’s indirect investments will include other investment funds (which may include those that are managed or operated by the ACD or an associate of the ACD), to give further bonds exposure.

The Fund expects to invest 60% or greater in conventional gilts issued by the UK Government, index linked gilts and in investment grade corporate bonds.

The Fund may also hold other assets, including global sovereign debt and sub-investment grade corporate bonds and cash.

Bonds are like loans that pay a fixed or variable rate of interest issued by governments, companies and other large organisations worldwide. Bonds are classified by rating agencies for their creditworthiness: those rated ‘investment grade’ generally carry a relatively low risk of default but also tend to offer lower yields than ‘non-investment grade’ bonds which, in turn, generally have a higher risk of default but also tend to offer higher yields.

The Fund may only make use of derivatives, which are sophisticated instruments whose value is linked to the rise and fall of other assets, for the purposes of hedging and efficient portfolio management, with the aim of managing risk and cost.

The Fund is actively managed. This means the Investment Manager uses their expertise to pick investments to achieve the Fund’s objective.

Any income this share class generates will be reinvested to grow the value of your investment.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

- The Fund is ranked 4 because funds of this type have experienced average rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond. There may be cases where the organisation from which we buy a bond fails to carry out its obligations which could cause losses to the Fund.
- Investing in other funds may expose investors to increased risk due to less strict regulations and the use of derivatives. These other funds can themselves invest into assets such as bonds, company shares, cash and currencies. The objectives and risk profiles of these underlying funds may not be fully in line with those of this Fund.
- The level of income may go down as well as up and is not guaranteed.
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease or increase.
- For further risk information please see the Prospectus.
