

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

MI Select Managers Alternatives Fund (“the Fund”) Institutional Accumulation Shares

This is a sub fund of MI Brewin Dolphin Investment Funds. The Fund is a non-UCITS retail scheme Open Ended Investment Company. ISIN: GB00BL69L593
Apex Fundrock Ltd is the Authorised Corporate Director of the Fund (“MI” and “MI Funds” are trading names of the ACD).

Objectives and investment policy

The Fund aims to provide a positive return (from investment growth and income) on a rolling five-year basis, by investing flexibly in a broad range of investments.

A positive return is not guaranteed over five years or any period and you could lose money.

The Fund can invest globally (including in emerging markets).

The Fund will typically be invested (directly or indirectly) 70% or above (but a minimum of 50%) in alternative assets such as commodities (including gold and other precious metals), real estate, private equity, and absolute return strategies. The Fund may also have exposure to company shares, bonds, debt, cash and near cash. Allocations may vary significantly and exposure to certain asset classes, markets, sectors or currencies may be concentrated from time to time, in response to market conditions and opportunities.

The Fund can invest up to 15% in other investment funds (which may include those that are managed or operated by the ACD or an associate of the ACD).

Bonds are like loans that pay a fixed or variable rate of interest issued by governments, companies and other large organisations worldwide. Bonds are classified by rating agencies for their creditworthiness: those rated ‘investment grade’ generally carry a relatively low risk of default but also tend to offer lower yields than ‘non-investment grade’ bonds which, in turn, generally have a higher risk of default but also tend to offer higher yields.

The Fund has a multi-manager structure, which means that its assets are managed by a number of specialist investment managers, appointed and monitored by the Fund’s Asset Allocation Manager. Each of these investment managers has discretion to select investments for an assigned portion of the Fund’s assets.

The Fund can use derivatives, which are sophisticated instruments whose value is linked to the rise and fall of other assets, for investment purposes to generate market exposure that exceeds the value of its assets and for the purposes of hedging and efficient portfolio management, with the aim of managing risk and cost.

Any income this share class generates will be reinvested to grow the value of your investment.

You can buy and sell shares on any business day in London.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund’s ranking on the Risk and Reward Indicator.

- The Fund is ranked 3 because funds of this type have experienced low to medium rises and falls in value in the past. Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
- Investing overseas can bring additional returns and spread risk to different markets. There are risks, however, that changes in currency exchange rates may cause the value of your investment to decrease or increase.
- Investing in other funds may expose investors to increased risk due to less strict regulations and the use of derivatives. These other funds can themselves invest into assets such as bonds, company shares, cash and currencies. The objectives and risk profiles of these underlying funds may not be fully in line with those of this Fund.
- The Fund may invest in property funds which can be less liquid than other asset classes.
- Bond values are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond. There may be cases where the organisation from which we buy a bond fails to carry out its obligations, which could cause losses to the Fund.
- This Fund can use derivatives in order to meet its investment objectives or to protect from price and currency movement. This may result in losses or gains that are greater than the original amount invested.
- For further risk information please see the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.48%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is estimated because the share/unit class is relatively new and has insufficient track record for us to calculate it exactly. The ongoing charges figure may vary from year to year and will exclude the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- THE ONGOING CHARGE BASED ON THE MAXIMUM INVESTMENT MANAGEMENT CHARGE OF 0.90% WOULD BE 1.24%.
- THE ONGOING CHARGE OF 0.48% IS BASED ON THE CURRENT INVESTMENT MANAGEMENT CHARGE OF 0.14%.
- For the ongoing charge, the figure is as at 31 August 2024.
- You may also be charged a dilution levy on entry to or exit from the Fund, this is to cover costs associated with your transaction.
- For more information about charges, please see the prospectus.
