

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

SJP Balanced Managed

(ISIN: Class L accumulation units GB00B63W3X82). This fund is managed by St. James's Place Unit Trust Group Ltd.

Objectives and investment policy

The investment objective of the fund is to provide capital appreciation over a period of five years. The fund will achieve this objective by investing at least 70% in quoted securities on a worldwide basis including in UK and overseas equities, UK and overseas fixed interest and index linked securities (including, but not limited to, corporate bonds, conventional government bonds and inflation linked government bonds).

The fund may also invest in units and/or shares in other collective investment schemes, cash and near cash. The fund is also permitted to invest directly or indirectly in other asset classes including in other types of transferable securities, money market instruments, deposits, asset-backed securities, collateralised loan obligations and may enter into repurchase agreements. The fund is permitted to invest in derivatives and forward transactions for the purposes of investment at all times across all asset classes and efficient portfolio management (including hedging). Where derivatives are used by the Manager for fixed income related strategies, this is likely to result in the fund being exposed to higher leverage.

The fund is actively managed without reference to a benchmark. The strategy has a complementary blend of investment styles to implement bottom up fundamental analysis, as well as top down valuation measures, which seek out opportunities in multiple asset classes.

You can choose to invest in accumulation units, which reinvest any income produced by the fund's investments, or income units which pay the income to the investor quarterly in February, May, August and November.

The fund is normally priced every working day and you can take your money out whenever you wish to do so.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Other information: The fund's custodians hold assets on behalf of the fund but separate from their own balance sheets. This is designed to protect the assets if the custodian's default on their obligations. For further details on the specific risks applicable to this fund please see the fund's prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

The category above reflects how much the fund's unit price has moved up and down over the last five years. The fund holds a wide range of investments including equities and bonds. Its value can fluctuate, but tends to move less than a fund investing only in equities. Even funds in the lowest risk category are not risk-free. The value of your investments is not guaranteed and you may not get back the amount invested.

Other key risks to understand for this fund are:

- **Credit risk.** This fund invests in fixed income securities, including bonds issued by companies and governments. There is a risk the issuer of these securities will fail to make interest or capital payments. The value of these securities will be affected by a change in the issuer's ability to make payments, or the perceived credit quality of the issuer.
- **Interest rate risk.** The fund's investments are sensitive to changes in interest rates. For example, an increase in interest rates will usually cause a fall in the value of the fund's investments.
- **Foreign currency exposure.** The fund holds assets denominated in other currencies, the value of which may rise and fall due to movements in exchange rates.
- **Emerging markets.** This fund invests in less developed economies and less mature markets, so its value may fluctuate more than that of a fund which invests in developed economies.
- **Leverage.** This fund makes significant use of derivatives for investment purposes and efficient portfolio management. This may result in the fund being leveraged and creates the potential for large fluctuations in the value of the fund. The fund could be exposed to a greater loss than the initial investment in the derivative transaction. Leverage on certain types of transactions may: impair the fund's liquidity, cause it to sell holdings at unfavourable times, or otherwise cause the fund not to achieve its intended objectives.
- **Counterparty risk.** The fund may trade in instruments which are not dealt on a centralised exchange. There is a risk that the counterparties of such trades may fail in meeting their obligations.
- **Liquidity risk.** In certain market conditions the fund's investments may be illiquid, meaning at times they may be difficult to buy and sell. This may cause an adverse impact on the trading price and can decrease the value of the fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	1.63%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

The entry and exit charges shown are maximum figures. In some cases you might pay less. For example, switches into this fund from other St. James's Place Unit Trusts receive a discount of up to 5% from the entry charge. Your St. James's Place Partner can give you more information about this.

The ongoing charges figure is based on expenses for the year ending 31 March 2024. This figure may vary from year to year. It does not include costs incurred by the fund when buying or selling assets.

More information about charges can be found in section 14 of the fund's prospectus, available from your St. James's Place Partner.
