This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Starhunter Fund 2 Accumulation Shares GBP [ISIN: GB00BNKCV034] Income Shares GBP [ISIN: GB00BNKCV141]

The Fund is a sub-fund of Starhunter Investments Fund.  
The Authorised Corporate Director of the Fund is Tutman Fund Solutions Limited, part of the Thesis group.

### Objectives and investment policy

The Fund aims to generate capital growth over the long term (at least 7 to 10 years).

The Fund is a multi-asset fund meaning that it will have exposure, mainly through collective investment schemes (which may include those managed by the ACD), to a range of asset classes.

The Fund is not constrained by any particular asset allocation in respect of geography, industry or sector.

In normal market conditions 50%-85% of the Fund will typically be invested in shares.

The Fund may also invest, directly or indirectly, in:

- bonds issued by governments and other organisations
- other investment funds
- cash, near cash, deposits and money market instruments
- gold, however exposure to gold will be through exchange traded funds

The Fund operates an exclusions policy and will not invest in companies (directly or indirectly via collective investment schemes) that derive:

- any revenue from the manufacture, development of or trade in controversial weapons (including cluster munitions, anti-personnel mines, biological or chemical weapons, depleted uranium and nuclear weapons);
- more than 10% of their annual revenue from the manufacture and production of tobacco or alcohol or from gambling activities; or
- more than 5% of their annual revenue from the production or extraction of fossil fuels.

The Fund may use derivatives and forward transactions for Efficient Portfolio Management (EPM), i.e. to protect against market or currency movements, to reduce costs, or to earn income or capital.

Income Shares: Any income the Fund generates will be paid out to you.

Accumulation Shares: Any income the Fund generates will be reinvested.

You can buy and sell shares on the 15th day and the last Business Day of the month except where the 15th is not a Business Day when it shall be the next Business Day thereafter.

The Fund is actively managed, which means that the manager has discretion over the composition of its portfolio, and the Fund is not tracking a benchmark nor is the Fund constrained by the value, price or components of a benchmark or any other aspect. The Fund is also not aiming to match or exceed the return of any benchmark.

For full investment objectives and policy details please refer to the Prospectus.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,  
lower risk

Typically higher rewards,  
higher risk

- The Fund is in a medium category because the price of its investments have risen or fallen to some extent. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.
- The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to future performance.
- Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. This is usually a greater risk for bonds that produce a higher level of income. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value.
- Where the Fund invests into other investment funds, they may invest in different assets, countries or economic sectors and therefore have different risk profiles not in line with those of the Fund.
- The Fund is entitled to use derivative instruments for EPM. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid. This could adversely impact the value of the Fund.
- The organisation from which the Fund buys a derivative may fail to carry out its obligations, which could also cause losses to the Fund.
- The price of gold or other resources may be subject to sudden, unexpected and substantial fluctuations. This may lead to significant declines in the values of any companies developing these resources in which the Fund invests and significantly impact investment performance.
- The Fund may invest in securities not denominated in sterling, the value of your investments may be affected by changes in currency exchange rates.
- For full details on risk factors for this Fund, please refer to the Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	7.50%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the Fund over a year

Ongoing charges	1.74%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is annualised based on the expenses incurred during the period 1 August 2024 to 31 January 2025. The ongoing charges figure may vary from year to year and will exclude the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- The ongoing charges figure is a representation of the charges taken from the Fund over a year. The estimated ongoing charge of 1.74% is based on the actual Annual Management Charge (AMC) of 1.03%. Should the maximum AMC of 1.50% be charged in future, the estimated ongoing charges figure would be 2.21%.
- Previously, the Ongoing Charges Figure (OCF) included expenses incurred by a Fund on any investments in collective investment schemes and closed ended vehicles such as investment trusts (the synthetic OCF). Following guidance issued by the Investment Association on 30 November 2023, any synthetic OCF now excludes the expenses of closed ended vehicles.
- A dilution levy may be charged on a purchase or sale of shares in the Fund in some cases. It may be necessary to reduce the difference between the cost of buying or selling the Fund's investments and the Fund's mid-market share price. Any dilution levy charged will be paid into the Fund.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- For further information about charges, please refer to relevant sections in the Fund's Prospectus.
