

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

SVS Dowgate Cape Wrath Focus Fund Class A Accumulation Shares GBP [ISIN: GB00BYQLQR34]

The Authorised Corporate Director of the Fund is Tutman Fund Solutions Limited trading as St Vincent St Fund Administration, part of the Thesis group.

Objectives and investment policy

The Fund aims to generate capital growth over the long term (5 years).

There is no guarantee that the investment objective will be achieved over any time period and capital is at risk.

The Fund will aim to meet its objective by typically investing at least 70% in a concentrated portfolio of UK listed equities (however at times investments in equities may be less than 70% due to liquidity or market conditions). In addition to investing in equities, the Fund may also invest in other transferable securities (such as bonds and gilts), collective investment schemes (that provide exposure to investments including equities and gilts) and which may include those managed and/or advised by the Authorised Corporate Director or Investment Manager), money market instruments, deposits, cash and near cash.

The Fund will not have any particular industry or economic sector focus and as such weightings in these may vary as required.

The Fund may use derivatives for efficient portfolio management (EPM), i.e to protect against market or currency movements, to reduce cost or to earn income or capital.

You can buy and sell shares Monday to Friday excluding UK public and bank holidays.

The Fund is actively managed, which means that the manager has discretion over the composition of its portfolio, and the Fund is not tracking a benchmark nor is the Fund constrained by the value, price or components of a benchmark or any other aspect. The Fund is also not aiming to match or exceed the return of any benchmark.

Any income the Fund generates will be reinvested.

For full investment objectives and policy details please refer to the Prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on the past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- The Fund is in a higher category because the price of its investments have risen or fallen frequently and more dramatically than some other types of investment. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.
- Due to its concentrated portfolio, the Fund may be more volatile compared to other funds with more broadly diversified portfolios.
- The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to future performance.
- Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. This is usually a greater risk for bonds that produce a higher level of income. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value.
- Where the Fund invests into other investment funds, they may invest in different assets, countries or economic sectors and therefore have different risk profiles not in line with those of the Fund.
- The Fund is entitled to use derivative instruments for EPM. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid. This could adversely impact the value of the Fund. The organisation from which the Fund buys a derivative may fail to carry out its obligations, which could also cause losses to the Fund.
- The Fund may invest in securities not denominated in sterling, the value of your investments may be affected by changes in currency exchange rates.
- If there are significant requests for redemption of shares in the Fund at a time when a large proportion of the Fund's assets are invested in illiquid investments (which are assets that may at times be hard to sell), there is a risk that there may be a delay in the investments being sold or the price at which they are sold may adversely affect the value of the Fund. The Fund's ability to settle redemptions could be impaired and it might be necessary to suspend dealings in shares in the Fund and in such circumstances investors may experience a delay or receive less than expected when selling their investments. For full details please refer to Risk Factors in the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.38%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	20% of any returns the Fund achieves above its Comparator benchmark (MSCI UK IMI Net Dividends Reinvested Index) provided the high water mark is exceeded.
-----------------	--

- The ongoing charges figure is annualised based on the expenses incurred during the period 1 August 2024 to 31 January 2025. The ongoing charges figure may vary from year to year and will exclude the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- The Investment Manager of the Fund has undertaken to absorb any costs (excluding the effect of the performance fee and underlying collective investment undertaking holding charges) that would otherwise cause the Fund to have operating expenses in excess of 0.45%.
- A dilution levy may be charged on a purchase or sale of shares in the Fund in some cases. It may be necessary to reduce the difference between the cost of buying or selling the Fund's investments and the Fund's mid-market share price. Any dilution levy charged will be paid into the Fund.
- In order for a performance fee to be payable in respect of a performance period, (1) the performance of the Fund must exceed that of the Comparator benchmark and (2) the Net Asset Value per share on the relevant calculation day without deduction of any accrued performance fee and adding back any income earned and distributed during such Performance Period must exceed the High Water Mark (HWM). The HWM is the highest of (1) the launch price and (2) the highest price at any performance period end date.
- The Fund's annual report for each financial year will include detail on the exact charges made. For further information about charges and the performance fee, please refer to relevant sections in the Fund's Prospectus.

Past performance

Source: FE fundinfo 2026

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 03/10/2016.
- Share/unit class launch date: 03/10/2016.
- Performance is calculated in GBP.
- All charges and fees, except any entry, exit or switching charges, have been included within the performance calculation.
- On 01/08/2024 the Fund's name changed from VT Cape Wrath Focus Fund to SVS Dowgate Cape Wrath Focus Fund.
