

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

SVS Heritage Balanced Portfolio Fund Class A Accumulation [ISIN: GB00BDQPPL57] Class A Income [ISIN: GB00BDS66M46]

The Fund is a sub-fund of SVS Heritage Investment Fund
The Authorised Corporate Director of the Fund is Smith & Williamson Fund Administration Limited trading as St Vincent St Fund Administration, part of the Smith & Williamson group.

Objectives and investment policy

The Fund aims to achieve a total investment return (comprising of a balance of capital growth and income) over the long term (at least 5 years).

The Fund can invest in:

- shares
- bonds issued by governments and other organisations
- other investment funds (including real estate investment trusts)
- cash, deposits and money market instruments.

There are no geographical restrictions on the countries of investment.

The Fund may use derivatives for Efficient Portfolio Management (EPM), i.e. to protect against market or currency movements, to reduce costs, or to earn income or capital.

Accumulation shares: Any income the Fund generates will be reinvested.

Income shares: Any income the Fund generates will be paid out to you.

You can buy and sell shares on Monday to Friday, 9am to 5pm, London time, where these days are business days.

The Fund is actively managed, which means that the manager has discretion over the composition of its portfolio, and the Fund is not tracking a benchmark nor is the Fund constrained by the value, price or components of a benchmark or any other aspect. The Fund is also not aiming to match or exceed the return of any benchmark.

For full investment objectives and policy details please refer to the Prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- The Fund is in a higher category because the price of its investments have risen and fallen frequently and more dramatically than some other types of investment. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.
- The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to future performance.
- Exposure to the risks associated with property investment, include but are not limited to, fluctuations in land prices, construction costs, interest rates, inflation and property yields, changes in taxation, legislation changes in landlord and tenant legislation, environmental factors, and changes in the supply and demand for property.
- Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. This is usually a greater risk for bonds that produce a higher level of income. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value.
- Investment trusts and closed ended funds may borrow to purchase additional investments. This can increase returns when stock markets rise but will magnify losses when markets fall.
- The value of an investment trust or a closed-ended fund moves in line with stock market demand and its share price may be less than or more than the net value of the investments it holds.
- The Fund is entitled to use derivative instruments for EPM. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid. This could adversely impact the value of the Fund.
- The organisation from which the Fund buys a derivative may fail to carry out its obligations, which could also cause losses to the Fund.
- For full details on risk factors for this Fund, please refer to the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	1.84%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- Previously, the Ongoing Charges Figure (OCF) included expenses incurred by underlying holdings of collective investment schemes in relation to the Fund (the synthetic OCF). Following guidance issued by the Investment Association on 2 July 2020, the synthetic OCF calculation has been expanded to include investment trusts.
- A dilution adjustment may be applied to adjust the price of shares, as it may be necessary to reduce the difference between the cost of buying or selling the Fund's investments and the Fund's mid-market share price.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- The ongoing charges figure is for the year ending 31/12/2020.
- For further information about charges, please refer to relevant sections in the Fund's Prospectus.

Past performance

Source: FE fundinfo 2021

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 01/12/2016.
- Share/unit class launch date: 01/12/2016.
- Performance is calculated in GBP.
- All charges and fees, except any entry, exit or switching charges, have been included within the performance calculation.
