SVS AllianceBernstein Europe (Ex UK) Equity Fund Z Income Shares GBP [ISIN: GB00BJMHLN16]

The Fund is a sub-fund of SVS AllianceBernstein UK OEIC.
The Authorised Corporate Director of the Fund is Tutman Fund Solutions Limited trading as St Vincent St Fund Administration, part of the Thesis group.

Objectives and investment policy

The Fund aims to achieve an increase in the value of its investment over a rolling 5 year period after the deduction of all fees through an actively managed, diversified portfolio of shares in European (excluding UK) companies.

The Fund will invest at least 80% of the Fund's total value in shares of European (excluding UK) companies. Investment can be direct or indirectly in equity related securities. Indirect exposure may be achieved by investing up to 10% of the Fund's value in Collective Investment Schemes, which may include other funds managed by the Investment Manager or its affiliates.

The Fund will be diversified (investing in at least 30 companies) and the Investment Manager's investment decisions are not restricted to any specific industry sector or company size.

The Fund may also invest up to 20% of its value in money market instruments, deposits, cash and near cash.

The Fund may invest in shares of UK companies to achieve its Investment objective. At all times the Fund's investment into UK companies will not exceed 5% of the Fund's net assets.

Any income the Fund generates will be paid out to you

You can buy and sell shares Monday to Fridays excluding UK public and bank holidays.

The Investment Manager will include, as part of its overall investment process, Environmental, Social, and Governance ("ESG") factors when considering whether or not to invest in or sell particular shares. The Investment Manager is not restricted by the investment policy from holding a particular company, unless the company is identified in accordance with the Fund's Exclusion Policy as stated in the prospectus.

The Fund may also use derivatives for investment, efficient portfolio management or hedging purposes. Use of derivatives for investment purposes are limited to currency forwards used to gain exposure to European (ex UK) currencies.

The Fund is actively managed, which means that the manager has discretion over the composition of its portfolio, and the Fund is not tracking a benchmark nor is the Fund constrained by the value, price or components of a benchmark or any other aspect.

The Fund is also not aiming to match or exceed the return of any benchmark. For full investment objectives and policies details please refer to the Prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards, lower risk — **Typically higher rewards, higher risk**

1	2	3	4	**5**	6	7

- The Fund is in a higher category because the price of its investments have risen or fallen frequently and more dramatically than some other types of investment. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.
- The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to future performance.
- Equity Securities: Equities can lose value rapidly, and typically involve higher market risks than bonds, money market instruments or other debt instruments. Fluctuation in value may occur in response to activities of individual companies, the general market, economic conditions, or changes in currency exchange rates.
- Concentration: In certain conditions the Fund may invest in a relatively small number of securities, which may result in portfolio concentration in sectors, countries, or other groupings. These potential concentrations mean that a loss arising in a single investment may cause a proportionately greater loss in the Fund than if a larger number of investments were made.
- Liquidity: There is a risk that adverse market conditions may affect the Fund's ability to sell assets at the price the Fund would like, or the Fund may have to sell them at a loss.
- Currency: To the extent that a Fund holds assets that are denominated in currencies other than the base currency, any changes in currency exchange rates could reduce investment gains or income, or increase investment losses.
- Country: In certain countries, there are risks associated with custody and counterparties that are higher than in developed countries.
- ESG Investing: The Fund may use certain ESG criteria in their investment strategies. This may limit the types and number of investment opportunities available and, as a result, the Fund may underperform in relation to other funds that do not have an ESG focus.
- For full details on risk factors for this Fund, please refer to the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year	
Ongoing charges	0.10%

Charges taken from the Fund under specific conditions	
Performance fee	NONE

- The ongoing charges figure is estimated for year ending 28/02/2026 due to the share class having insufficient track record for the ongoing charges figure to be calculated exactly. The ongoing charges figure may vary from year to year and will exclude the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- A dilution adjustment may be applied to adjust the price of shares, as it may be necessary to reduce the difference between the cost of buying or selling the Fund's investments and the Fund's mid-market share price.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- For further information about charges, please refer to relevant sections in the Fund's Prospectus.
