

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Windrush Fund Income Shares [ISIN: GB00B1TVB294]

The Authorised Corporate Director of the Fund is Tutman Fund Solutions Limited, part of the Thesis group.

### Objectives and investment policy

The Fund aims to achieve a positive return (an increase in the value of the Fund) with a focus on capital preservation in all market conditions after all costs and charges have been taken, over any 12 month period.

The Fund will aim to achieve its objective by investing globally, including emerging markets (which are countries whose economies are progressing towards becoming advanced) in the following asset classes:

equities (company shares), bonds (loans to either a company or government that usually pay interest), alternative investments (property and precious metals), money market instruments (which are short term loans that pay interest) and cash. As part of the equity exposure, the Fund may invest in Investment Trusts.

The Investment Manager seeks to create a balanced portfolio by investing in both protective assets, such as bonds, derivatives and cash, and growth assets, such as equities. The Investment Manager seeks to identify opportunities where the potential rewards outweigh the potential risks through analysis of a company's markets, product/service offering, competitive position, financial strength and competence of its management.

The Fund may invest in other Funds (including those managed by the Manager, the Investment Manager and their associates).

The Fund will not invest directly in alternative assets, but by using for example other Funds.

The Fund may use derivatives and hedging for efficient portfolio management (EPM) and investment purposes, i.e to protect against market or currency movements, to reduce cost or to earn income or capital.

Any income the Fund generates will be paid out to you.

You can buy and sell shares on the 14th day of each month (provided that if such day is not a Business Day, the next following Business Day) and the last Business Day of each month, or any other Business Day at the ACD's discretion, agreed with the Depositary.

The Fund is actively managed, which means that the manager has discretion over the composition of its portfolio, and the Fund is not tracking a benchmark nor is the Fund constrained by the value, price or components of a benchmark or any other aspect. The Fund is also not aiming to match or exceed the return of any benchmark.

For full investment objectives and policy details please refer to the prospectus

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,  
lower risk

Typically higher rewards,  
higher risk

- The Fund is in a medium category because the price of its investments have risen or fallen to some extent. The category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category does not mean a risk-free investment.
- The price of the Fund and any income from it can go down as well as up and is not guaranteed. Investors may not get back the amount invested. Past performance is not a guide to future performance.
- Investments in emerging markets may involve greater risks due to political and economic instability and underdeveloped markets and systems. This means your money may be at greater risk of loss.
- Where the Fund invests in bonds, there is a risk the bond issuer may fail to meet its repayments. This is usually a greater risk for bonds that produce a higher level of income. Changes in interest rates, inflation and the creditworthiness of the bond issuer may also affect the bond's market value.
- The Fund may invest in other investment vehicles to gain indirect exposure to alternative assets such as property and precious metals. Exposure to such investments can involve a higher degree of risk that may increase the risk of investment loss. The performance of such vehicles can be volatile and there is a risk that investors may experience a delay in receiving redemption proceeds.
- The Fund is entitled to use derivative instruments for EPM and investment purposes. Derivatives may not achieve their intended purpose. Their prices may move up or down significantly over relatively short periods of time which may result in losses greater than the amount paid. This could adversely impact the value of the Fund.
- The organisation from which the Fund buys a derivative may fail to carry out its obligations, which could also cause losses to the Fund.
- The Fund may invest in securities not denominated in sterling, the value of your investments may be affected by changes in currency exchange rates.
- The Fund may invest in assets where, in difficult market conditions, there is an increased risk that a position cannot be bought or sold in a timely manner or at a reasonable price and the Manager may suspend dealing in the Fund.
- For full details on risk factors for this Fund, please refer to the prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	7.50%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

### Charges taken from the Fund over a year

Ongoing charges	2.03%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is estimated due to a change in fee structure on 01/09/2025. As such the previous ongoing charges calculation no longer offers a reliable indication of the charges that the Fund is exposed to. The ongoing charges figure may vary from year to year and will exclude the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- A dilution levy may be charged on a purchase or sale of shares in the Fund in some cases. It may be necessary to reduce the difference between the cost of buying or selling the Fund's investments and the Fund's mid-market share price. Any dilution levy charged will be paid into the Fund.
- The Fund's annual report for each financial year will include detail on the exact charges made.
- For further information about charges, please refer to relevant sections in the Fund's prospectus.

## Past performance

Source: FE fundinfo 2026

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 20/03/2007.
- Share/unit class launch date: 20/03/2007.
- Performance is calculated in GBP.
- All charges and fees, except any entry, exit or switching charges, have been included within the performance calculation.
