## Baillie Gifford Worldwide Global Strategic Bond Fund Class A - USD Accumulation Shares - ISIN IE00BK70YV13

This Fund is a sub-fund of Baillie Gifford Worldwide Funds PLC.

### Objectives and investment policy

#### Objective

- The Fund aims to achieve a high level of total return through combined capital growth and income payment.

#### Policy

- Investment will primarily be in investment grade and below investment grade bonds issued by companies worldwide.
- To help to achieve the total return target, derivatives, which are a type of financial contract, are used.
- The fund is hedged to foreign currencies.
- The Fund is actively managed and no index is used for the purposes of constraining the composition of the Fund's portfolio. The Fund's performance (after deduction of costs) is measured against the 70% ICE BofA Global Corporate Index and 30% ICE BofA Global High Yield Index (hedged to USD). The Fund seeks to outperform the index.

#### Other Information

- Bonds are a type of investment which can be issued by companies when they want to borrow money. The issuer of the bond owes the holder a debt. The issuer is obliged to pay interest and/or repay the debt at a later date.
- Below investment grade bonds typically mean the risk of non-payment is high.
- You can sell some or all of your shares on any day on which banks in Ireland are open for business by contacting the Transfer Agent by phone or post.
- Income will be re-invested. No further shares will be purchased but the reinvestment will be reflected in the price of your existing accumulation shares.
- For further explanation and information see the investment objective and policy section of the Prospectus, which is available by contacting us.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- Please note that even the lowest risk class can lose you money and that extreme adverse market circumstances can mean you suffer severe losses in all cases.
- The Fund is classified in the category above because it invests in corporate bonds which generally provide higher rewards and higher risks than other investments such as government bonds and cash.
- The indicator does not take into account the following relevant material risks:
  - Investment markets can go down as well as up and market conditions can change rapidly. The value of an investment in the Fund, and any income from it, can fall as well as rise and you may not get back the amount invested.
  - Custody of assets involves a risk of loss if a custodian becomes insolvent or breaches duties of care.
  - Bonds issued by companies may be adversely affected by changes in interest rates, expectations of inflation and a decline in the creditworthiness of the bond issuer. The issuers of bonds in which the Fund invests may not be able to pay the bond income as promised or could fail to repay the capital amount.
  - The Fund's concentrated portfolio relative to similar funds may result in large movements in the share price in the short term.
  - Derivatives may be used to obtain, increase or reduce exposure to assets and may result in the Fund being leveraged. This may result in greater movements (down or up) in the price of shares in the Fund. It is not our intention that the use of derivatives will significantly alter the overall risk profile of the Fund.
  - Market values for illiquid securities which are difficult to trade may not be readily available, and there can be no assurance that any value assigned to them will reflect the price the Fund might receive upon their sale.
  - In certain circumstances it can be difficult to buy or sell the Fund's holdings and even small purchases or sales can cause their prices to move significantly, affecting the value of the Fund and the price of shares in the Fund.
  - Infectious viruses may pose significant threats to human health and may be highly disruptive to global economies and markets. The economic and market disruptions caused by infectious viruses could impact the value of the investments of the Fund and the distributions paid by the Fund to shareholders.
