

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Fund of Investment Trusts Halifax Class A Income

A sub-fund of the HBOS Specialised Investment Funds ICVC.
The Fund is managed by HBOS Investment Fund Managers Limited, part of the Lloyds Banking Group.
ISIN: GB0001370617

Objectives and investment policy

To achieve capital growth by investing almost exclusively in investment trust companies providing a balance of UK and overseas exposure.

The benchmark for the Fund is a blend of the FTSE All-Share Index and the FTSE World ex UK Index (the "Indices"). The Fund is actively managed by the Fund Manager who chooses investments with the aim of outperforming the benchmark by 2% per annum on a rolling 3 year basis, before deduction of fees.

The Fund Manager selects investment trust companies which it believes are invested in attractive markets and expect to perform better than other investments in the same asset category. Investment trust companies that may benefit from corporate actions* will also be selected. In choosing individual investment trust companies the Fund Manager focuses on the underlying investments of each company, the quality of the manager and the discount to or premium which the value of shares in investment trust companies are trading at to the value of their net assets.

The Fund Manager is limited in the extent to which positions can vary to those of the Indices. The limits help to provide a balance between the spread of assets within the Fund and risk management. They also provide a balance between the amount the Fund can vary from the Index and providing the Fund Manager with flexibility to seek to outperform the Indices. As a result the Fund's performance may differ substantially from the Indices.

* A corporate action is an event which brings change to a company and can affect the shares or bonds in that company.

The FTSE All-Share Index has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the UK equity market. The FTSE World ex UK Index has been selected as an appropriate benchmark as it provides a representation of developed and emerging markets excluding the UK.

Investors should aim to hold their investment in the Fund for the medium to long term (at least five to ten years). Any Income received by the Fund is paid out to you. Derivatives and stock lending may be used for the purpose of managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth (often referred to as efficient portfolio management). Shares can usually be bought and sold on any working day.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The Fund is ranked at 6 because it has experienced high levels of volatility over the past 5 years.
- The value of your investment and any income from it is not guaranteed and can go up and down depending on investment performance. Specific investment risks for the Fund are:
 - Company shares ('equities') generally offer higher long term growth potential than some other asset classes. Values can fluctuate considerably. There's a greater risk you might not get back all of your money.
 - Exchange rate changes might cause the value of overseas investments and any income from them to go up and down.
 - Smaller companies' shares might be subject to large price fluctuations, because these shares tend to be traded less frequently and in lower volumes than shares of larger companies.
 - Investment trust companies can borrow money to invest (known as gearing). This can increase the returns from the investment trust company, however, it can also increase the potential for losses. Where an investment trust in which the Fund invests uses gearing this could adversely affect the performance of the Fund.
 - The use of derivatives for Efficient Portfolio Management might not achieve the described outcomes and may result in greater fluctuations of the value of the Fund, however it is not intended that this will cause the risk profile of the Fund to change.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.50%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- The Ongoing Charge figure is as at 11/21
- The Ongoing Charge is taken from the income of the Fund. For more information about charges, please refer to the Prospectus of HBOS Specialised Investment Funds ICVC (Ref: E1650)

Past performance

Source: FE fundinfo 2022

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 30/11/1984.
- Share/unit class launch date: 03/12/1984.
- Performance is calculated in GBP.
- Performance is net of charges (excluding Entry Charge) and net of tax.
- The Index plus outperformance target and the Fund performance figures are shown on an annual basis.
- In practice, as explained in the 'Objective and investment policy' section, the Fund Manager's outperformance target applies over rolling 3 year periods.
- In addition, the Index plus outperformance target is calculated without deduction of charges whereas fund performance is calculated after deduction of charges.
- * Benchmark 1 – 35% FTSE All Share 65% FTSE World Ex UK + 2%
