

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Scottish Widows Corporate Bond PPF Fund Class W Accumulation

A sub-fund of the Scottish Widows Income and Growth Funds ICVC.
The Fund is managed by Scottish Widows Unit Trust Managers Ltd, part of the Lloyds Banking Group.
ISIN: GB00BD7W3W24

Objectives and investment policy

To provide a return consistent with the variations in market annuity rates with the aim of reducing annuity conversion risk. The benchmark index for the Fund is the iBoxx Sterling: Non Gilt Over 15 Year index (the "Index"). The Fund is actively managed by the Fund Manager who chooses investments with the aim of outperforming the Index by 0.35%* per annum on a rolling 3 year basis, before deduction of fees. At least 80% of the Fund will invest in long dated Sterling denominated investment grade** corporate bonds. In aiming to reduce the risk of annuity conversions, the Fund Manager will refer to target duration and credit ratings as part of the fund management strategy. The targets will be identified at the Fund Manager's discretion and may change in line with market annuity rates and fixed interest yields. The Fund may also invest in other investment grade corporate bonds, government bonds, supranational bonds (these are a type of fixed interest security issued by two or more governmental organisations) and emerging market bonds. In addition the Fund may invest in cash and cash like investments.

Investment in the asset classes will be direct, and indirect using derivatives as an additional way for the Fund to invest with the aim of meeting the Fund's investment objective. The extent of derivative use for investment purposes is dependent on market conditions and will be limited as the intention is that this should not change the risk profile of the Fund. Derivatives and stock lending may be used for the purpose of managing the Fund in a way that is designed to reduce risk (for example by hedging) or cost and/or generate extra income or growth (often referred to as efficient portfolio management). Where the Fund's investments are non-Sterling denominated they will be hedged back to Sterling. Hedging involves the use of the derivatives to offset the effect of currency exchange rates.

The Fund Manager is limited in the extent to which positions can vary to those of the Index. The limits help to provide a balance between the spread of assets within the Fund and risk management. They also provide a balance between the amount the Fund can vary from the Index and providing the Fund Manager with flexibility to seek to outperform the Index. As a result the Fund's performance may differ from the Index. The Fund does not provide any guarantee of the level of pension in retirement or the cost of buying that pension. It may not be effective for those who intend to buy an inflation-linked pension and does not provide protection against changes in the cost of buying a pension that arise from changes in life expectancy.

*Note: there are Share Classes in the Fund where fees exceed the Fund's outperformance target relative to the Index. For those Share Classes, the Fund will underperform the Index after deduction of fees even if its outperformance target is achieved.

**Credit ratings indicate the likelihood that an issuer will be able to make their payments. Investment grade bonds have achieved or exceeded a minimum credit rating awarded by a credit rating agency. Therefore they are considered lower risk than bonds with a lower credit rating.

The iBoxx Sterling Non-Gilts Index has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the investment grade corporate bond market.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The Fund is ranked at 5 because it has experienced medium to high levels of volatility over the past 5 years.
- The value of your investment and any income from it is not guaranteed and can go up and down depending on investment performance. Specific investment risks for the Fund are:
- The value of a bond / fixed interest security could fall if the issuer's credit rating falls. Values are also likely to fall if interest rates rise (but increase when interest rates fall). In addition issuers might fail to make their income payments and/or repay capital.
- The use of derivatives for Efficient Portfolio Management might not achieve the described outcomes and may result in greater fluctuations of the value of the Fund, however it is not intended that this will cause the risk profile of the Fund to change.
- Using derivatives for investment purposes is not intended to increase the Fund's risk profile, but may increase volatility. Derivative strategies could increase or reduce the impact of market movements which has the potential to result in greater losses, or gains, to the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.02%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- There is no charge to switch into this fund. You may incur an Exit Charge from the fund you are switching from. Please refer to the KII document for that fund.
- The Ongoing Charge figure is as at 02/22
- The Ongoing Charge is taken from the income of the Fund. For more information about charges, please refer to the Prospectus of Scottish Widows Income and Growth Funds ICVC, which is available at www.scottishwidows.co.uk/kiids
- Investors should aim to hold their investment in the Fund for the medium to long term (at least five to ten years). Any Income received by the Fund is retained in the Fund and has the effect of increasing the share price.

Past performance

	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021
Fund				-2.3	19.3	6.0	-5.1	17.6	14.8	-5.7
Benchmark 1 *				-0.9	19.0	6.3	-3.8	17.8	15.2	-5.4
