

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Scottish Widows UK Equity Income Fund Class A Accumulation

A sub-fund of the Scottish Widows UK and Income Investment Funds ICVC.
The Fund is managed by Scottish Widows Unit Trust Managers Ltd, part of the Lloyds Banking Group.
ISIN: GB0031643561

Objectives and investment policy

To provide income, along with potential capital growth by investing in shares of companies which are part of the FTSE All-Share Index (the "Index").

Investments are selected by the Fund Manager which, collectively, aim to deliver an income of 110% of the dividend yield† of the Index on a rolling 3 year basis, before deduction of fees, and outperform the Index by 1.25%* per annum on a rolling 3 year basis, before deduction of fees. At least 80% of the Fund will invest in companies which are part of the Index. The majority of these companies are those which are incorporated, or domiciled, or have a significant part of their business in the UK. Companies will be selected which have the potential to provide higher than average dividend yields† and to achieve capital growth. The Fund seeks to hold more in these companies in comparison to the Index. Therefore, while the Fund will invest in a large number of companies in common with the Index, the amount held in any one company may be significantly different to the Index.

The Fund is limited in the extent to which it can hold more (overweight) or less (underweight) in sectors†† relative to the Index, but it aims to hold more in sectors which are expected to provide a higher than average dividend yield. The limits help to provide a balance between the spread of assets within the Fund and risk management. They also provide a balance between the amount the Fund can vary from the Index and providing the Fund Manager with flexibility to seek to outperform the Index. As a result the Fund's performance may differ from the Index.

*Note: there are Share Classes in the Fund where fees may exceed the Fund's outperformance target relative to the Index. For those Share Classes, the Fund may underperform the Index after deduction of fees even if its outperformance target is achieved.

† The dividend yield is calculated by dividing the annual dividend paid in respect of a share by its share price.

†† A sector is a business area, industry or economy which shares the same characteristics. Company shares are typically grouped into different sectors depending on the company's business, for example travel and leisure or telecommunications.

The FTSE All-Share Index has been selected as an appropriate benchmark as it provides a representation of the returns of securities in the UK equity market.

Investors should aim to hold their investment in the Fund for the medium to long term (at least five to ten years). Any Income received by the Fund is retained in the Fund and has the effect of increasing the share price. Derivatives and stock lending may be used for the purpose of managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth (often referred to as efficient portfolio management). We calculate the value of the Fund at 8am daily on working days in the UK. Our dealing times are from 9am to 5pm each working day. Instructions received before 5pm will receive the next day's price.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

Typically lower rewards,
lower risk

Typically higher rewards,
higher risk

- The Fund is ranked at 6 because it has experienced high levels of volatility over the past 5 years.
- The value of your investment and any income from it is not guaranteed and can go up and down depending on investment performance. Specific investment risks for the Fund are:
 - Company shares ('equities') generally offer higher long term growth potential than some other asset classes. Values can fluctuate considerably. There's a greater risk you might not get back all of your money.
 - The use of derivatives for Efficient Portfolio Management might not achieve the described outcomes and may result in greater fluctuations of the value of the Fund, however it is not intended that this will cause the risk profile of the Fund to change.
- As the Fund invests predominantly in companies which are part of the FTSE All Share Index, performance, before charges, may fall and rise with the Index.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.88%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- There is no charge to switch into this fund. You may incur an Exit Charge from the fund you are switching from. Please refer to the KII document for that fund.
- The Ongoing Charge figure is as at 02/22
- The Annual management charge (AMC) reduced from 1.25% to 0.80% on 21/06/2021. The ongoing charges will include periods of the higher and lower AMC in the calculation. The annual report for each financial year will include detail on the exact charges made.
- Part or all of the Ongoing Charge is taken from the Fund's capital. For more information about charges, please refer to the Prospectus of Scottish Widows UK and Income Investment Funds ICVC, which is available at www.scottishwidows.co.uk/kiids

Past performance

Source: FE fundinfo 2022

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 16/10/1970.
- Share/unit class launch date: 16/10/1970.
- Performance is calculated in GBP.
- Performance is net of charges (excluding Entry Charge) and net of tax.
- The Index plus outperformance target and the Fund performance figures are shown on an annual basis.
- In practice, as explained in the 'Objective and investment policy' section, the Fund Manager's outperformance target applies over rolling 3 year periods.
- In addition, the Index plus outperformance target is calculated without deduction of charges whereas fund performance is calculated after deduction of charges.
- * Benchmark 1 – FTSE All Share + 1.25%
