

Non-UCITS retail scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Scottish Widows Balanced Income Portfolio Class P Accumulation

A sub-fund of the Scottish Widows Managed Investment Funds ICVC.
The Fund is managed by Scottish Widows Unit Trust Managers Ltd, part of the Lloyds Banking Group.
ISIN: GB00BD497Y60

Objectives and investment policy

To provide an income and the potential for capital growth by investing in other funds to provide exposure to a range of different asset classes.

Between 45% and 80% of the Fund will provide exposure to fixed interest securities. This will include sterling denominated investment grade* bond funds which may consist of corporate, government and index-linked bonds. It may also include overseas and emerging markets corporate and government bond funds, and high yield bond** funds. Between 10% and 40% of the Fund will provide exposure to shares. This can include funds which may consist of UK, overseas and emerging markets shares. A maximum of 17% of the Fund will provide exposure to property. This may include UK and overseas property funds. The Fund may also provide exposure to absolute return strategies, commodities and (directly or indirectly) cash and cash like investments.

The funds may be actively or passively managed*** and may include up to 100% investment in funds which have been or are currently managed or advised by Scottish Widows Unit Trust Managers (SWUTM) and/or an associate of SWUTM.

Derivatives may be used for the purpose of managing the Fund in a way that is designed to reduce risk or cost and/or generate extra income or growth (often referred to as efficient portfolio management). The funds in which the Fund invests may use techniques which are not employed by the Fund itself, for example the use of derivatives for investment purposes and stock lending.

* Credit ratings indicate the likelihood that an issuer will be able to make their payments. Investment grade bonds have achieved or exceeded a minimum credit rating awarded by a credit rating agency. Therefore they are considered lower risk than bonds with a lower credit rating.

** Non-investment grade bonds, also known as high yield bonds, have a lower credit rating than investment grade bonds, and so are considered higher risk.

*** Active management is where the fund manager seeks to add value by making decisions on which investments to buy, sell or hold depending on, for example company, market or economic factors. Passive management is where the fund manager aims to match a benchmark and will buy, sell or hold investments depending on the components of that benchmark.

Performance Assessment: SWUTM does not quote a benchmark or outperformance target for the Fund. This is because the asset allocation of the Fund will change over time taking into consideration risk and SWUTM's view of the prospects of each asset class. Investors may assess the Fund relative to similar funds offered by other investment firms. A number of fund industry bodies and data providers group similar funds together and provide analysis on performance and risk characteristics of the fund group. The Investment Association "Mixed Assets Sectors" group funds with a range of different assets according to their allocation to shares, fixed interest securities and cash. More information on the Investment Association sectors can be found at www.theinvestmentassociation.org/fund-sectors.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The Fund is ranked at 4 because it has experienced medium levels of volatility over the past 5 years.
- The value of your investment and any income from it is not guaranteed and can go up and down depending on investment performance. Specific investment risks for the Fund are:
 - The value of a bond / fixed interest security could fall if the issuer's credit rating falls. Values are also likely to fall if interest rates rise (but increase when interest rates fall). In addition issuers might fail to make their income payments and/or repay capital.
 - Company shares ('equities') generally offer higher long term growth potential than some other asset classes. Values can fluctuate considerably. There's a greater risk you might not get back all of your money.
 - The fund invests in non-investment grade bonds / securities, which carry increased risks that the issuers might have their credit rating cut or might not be able to make their payments.
 - Emerging markets investments may suffer large price fluctuations. They are generally less well regulated than UK markets with less investor protection. Assets may be traded less often and in low volumes.
 - Property values can go up or down. Property can be hard to sell, and values could fall if properties have to be sold quickly.
 - Exchange rate changes might cause the value of overseas investments and any income from them to go up and down.
 - The use of derivatives for Efficient Portfolio Management might not achieve the described outcomes and may result in greater fluctuations of the value of the Fund, however it is not intended that this will cause the risk profile of the Fund to change.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year

Ongoing charges	0.88%
-----------------	-------

Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- There is no charge to switch into this fund. You may incur an Exit Charge from the fund you are switching from. Please refer to the KII document for that fund.
- The Ongoing Charge figure is as at 10/21
- The Ongoing Charge is taken from the income of the Fund. For more information about charges, please refer to the Prospectus of Scottish Widows Managed Investment Funds ICVC, which is available at www.scottishwidows.co.uk/kiids
- Investors should aim to hold their investment in the Fund for the medium to long term (at least five to ten years). Any Income received by the Fund is retained in the Fund and has the effect of increasing the share price.

Past performance

Source: FE fundinfo 2022

- You should be aware that past performance is not a guide to future performance.
- Fund launch date: 28/06/1990.
- Share/unit class launch date: 20/02/2017.
- Performance is calculated in GBP.
- Performance is net of charges (excluding Entry Charge).
- Investors may wish to consider the performance of the Fund by looking at the performance of the "Mixed Investment 0-35% Shares Sector" which as of June 2020 has a broadly similar allocation to shares, fixed interest securities and cash. The Fund may not always align with this sector and any changes will be notified via our website
